

finch food packaging papers

Custom Engineering & Expansive Capabilities

Finch Paper has a broad range of capabilities, from 30 lb. lightweights to 18 pt. board, servicing many markets with innovative applications. Finch's Product Development team works collaboratively and swiftly to help customers' speed to market. Our unique lay-flat technology, pulping process, paper machine flexibility and sheeting capability provide even more advantages.

Features:

- Multiple paper machines with wide trim and basis weight ranges
- Consistent quality in both products and service
- Excellent surface hold out and superior strength properties
- WOGP capabilities

Benefits:

- FDA-compliant for direct and indirect food contact
- Superior printing and converting performance
- Engineered for coating applications and poly extruding
- Compliance with California's Proposition 65
